ENVIROMENTAL DEFINITIONS

Global Envirommental variables. 

Temperature: nn,nn°C
upper limit: nn,nn°C
lower limit: nn,nn°C

Humidity: nn,nn%
upper limit: nn,nn°C
lower limit: nn,nn°C

Photoperiod:
set start hh:mm
set end hh:mm

get real start: hh:mm
get real end: hh:mm

uEinsteins: n nnn,nn

TESTS

TEST 1 TEST 2 TEST 3 +

Name: text field
Descriptive: text field
Plant : text field

Set Goal:
Crop | Blooming | Rooting | Fruit set
choose one

Automatic data collection: period or repetition interval
Date and Hour of Start: aaaammdd hh:mm

Raised bed probes:
1 | 2 | 3 | 4
Max 4 zones, max of experiments will vary accordingly to zones in use

Moisture: nn.nn%

Non-Environmental Data:
Substratum: just name it text field

Inoculation: (indicate agent and description):text field

ADD AND DESCRIBE
TESTS!!

MOISTURE STRESS TESTS

temporarily override moisture definitions

TEST 1 TEST 2 TEST 3 +

Set Start: aaaammdd hh:mm
Set End: aaaammdd hh:mm
Moisture: nn.nn%

FOR EACH TEST!

YOU CAN SCHEDULE MORE
THAN ONE SOLUTION P/TEST

FERTIRRIGATION SCHEDULING

s1 s2 s3 +

Choose Solution: (dropdown)

Set Start: aaaammdd hh:mm
Set End: aaaammdd hh:mm
or
Set Ammount: nn.nn liters
Set Repetition: monthly | weekly | daily
Moisture Override: nn.nn% or leave blank

TESTS ARCHIVE

SHOW DEFINITIONS (header along with start and finish timestamps)
 TIMESTAMP // AUTOLOG with choosen data from the test probe and
 greenhouse averages)
 INSERT QUALITATIVE AND QUANTITATIVE DATA
 INSERT T PHOTOS
 (each insertion of data is according to the open database fields
 defined in the options tab (top right corner icon)
 all insertions receive automatic timestamp and sensor data)
 ARCHIVE TEST (archived tests should be available for print, pdf)
